MINDS WORK DEVELOPMENTS

Electronics Management Software

Dashboard presents the basic functionality of adding customer, sale order, installment, expenses, and products.
It also presents the overview of different branches including today's sales, total customers, expenses, purchases and total balance of each branch.

Online Products, Online Orders, Delivered Order is dealing with online store of the user which is integrated with management system. It helps user to generate business from the listed store and to keep track record of the products, orders and delivered products.

The management system has following features:

- **Daily Sales** will allow user to add new daily sales record and to overview daily sales report.
- **Installment Record** allows user to add installment to existing installment plan and it also shows installment records report.
- **Vendor** functionality uses to add new vendors and to see the details of vendors.
- **Customers** functionality allows user to add new customers and to see the details of existing customers. It also helps user to see customer sales report.
- **Sales** is the detailed functionality which helps user to add new sales and it also redirects the user to add new customer.
- **Products** shows the list of products including the inventory of the products. The user can also create the new products. Product report is an additional feature to oversee the inventory of the products of each branch respectively.
  Purchases allows user to add new purchase and new vendor.
- **Employees** helps you to maintain the detailed records of the employees.
- **Expenses** can be added and it shows the detailed ledgers of the respective account.
  Salaries allows user to maintain records of salaries of the employees and their bonuses as well.

- **Defaulters** is very important functionality to keep record of the defaulters, who failed to pay their installment within 30 days. It also shows the detailed reports of defaulters.
- **Accounts** helps admin to oversee the cash balance of each branch. It also allows admin to see each account details with time stamps and date.
  Sales & Purchase returns helps you to keep records of the returns.
- **Company** is to add company of mobile manufacturers.
- **Categories** is to add the mobile model with its respective company.
- **Reports** helps administrator to oversee the detailed reports w.r.t dates of the respective branch to analyze the business with better understanding. It includes sales, customer sales, installment, daily sale, purchase, profits and expenses reports.
- **User Accounts** help admins to create new accounts of cashier or manager and also allows them to remove the accounts.
